SEARCH FOR SOVIET/SOMALI TRANSMITTING STATION

MOGADISCIO, SOMALIA

A search was conducted, utilizing aerial photography, in an effort to verify a reported secured installation which purports to be a 50 KW high frequency transmitting station under joint Soviet/Somali control. Excellent quality, high resolution photography was used for this search.

Several secured installations are observed in the vicinity of the town of Mogadiscio and the airfield (02-10N 45-19E). However, there is no evidence of a transmitting station at any of these secured installations, nor at any other location in the area of photographic coverage.
